How Bestroyed, Haw Restored.

Dr. N. S. PENDERN.

Physician and Surgeon,

No. 24 1-2 E. Washington St.

N CONNECTION WITH THE GENERAL PRACTICE of Medicine, I treat by a new and reliable medium, and with the happiest results, all forms of diseases of the Nervous, Seminal and Urinary and Sexual systems. Young men with hollow cheeks and pallid countenance, telling in fearful language the silent working of some formidable disease undermining your constitution, memory and reason, hurrying you to a premature death, re-flect while reason holds sway and avail yourself of a treatment that dissipates the slightest disease, and cures the harrassing weakness and other causes of serious difficulty and perpetual annoyance.

Spermatorrhœa, Seminal Weakness, Nocturnal Emis slons, Sexual Debility, impotency, Effects of Self-Abuse, and their results-Inability to Consummate the Marriage Contract, Mental and Physical Prostration, Epilepsy, sanity and Consumption.

Like a staunch murderer, steady to his purpose, Presses him close through every lane of life, Nor misses once the track, but presses on, Till forced at last to the tremendous verge,

Likew se, I will guarantee a radical cure of Syphilis, Gonorrheea and Gleet, in all their stages, entirely re-moving from the blood the last spark of these terrible diseases that se gradually burn up the fountain of life. Diseases and Conditions Peculiar to Females.

The beauty and extreme delicacy of the female organization, to say nothing of its physiological characteris-tics, are sufficient indications that it is subject to forms of disease and modifications peculiar to itself. The physician of the present day does not encounter any more forms of uterine diseases than did the physician of fifty years ago; but owing to the present social condition of woman, her diseases are increased to frequency, and to the truth of this assertion the melancholy deaths by consumption bear ample witness.

At the American Dispensary we treat by a new method, and with the happiest results, Prolap-sus Uteri, (falling of the wome,) Eruptions of the Skin, Chlorosis, or Green Sickness—characterized by yeilowish, dirty green palior of the surface; Emansio Messium, or absent Menstruction; Amenorrhea, or Retention of the Menses; Dysmenorrhea, a painful and diffi cult flow of the Mense; Menorrhagia, or profuse Menstruation; Leuchorrhes, or excessive and altered secretion of the mucus-generally white, or nearly coloress and transparent.

Reader, I have given you a class of diseases that are met with in Females of all ages, whether married or unmarried; and to married Females would say that there are many other forms of diseases peculiar to your sexdiseases of Pregnancy, Parturitien, and Lactation, of which space will not admit an elucidation. I omit it for the council chamber, adding but one more disease to this list, and that is a formidable one-Ulcerrtion of the body of the Uterus.

If you are afflicted with organic weakness, or any as-semblage of morbid phenomena of this character, you have no time to spare, but at once apply for m-d cal aid. If too late to arrest the disease, it is at least possible to pailiate the symptoms, and thus smoothe the pathway to an untimely grave.
In a majority of instances these diseases have made considerable progress before the patient becomes alarmed. In some cases an emaciation is the first indication that attracts the attention of the patient's friends. And here, reader, let me call your earnest attention to the fearful significance of the word "wasting." It not only constitutes the leading feature, but the earliest and mest ominous symptor s of Consumption, examples of which are invariably met with in young ladies who are gifted with high in lectual endowments, refined accomplishments, and eyes flashing with unnatural brilliancy-not regarding these fodications as being those

of incipient disease, but those of personal charms. True, alas! the poet sings-"Consumptions' cheek ne'er looks more pure. And lovely, than when past all cure, And yet that bloom, so fresh so still, Has lent its fleeting aid to kill, And speaks, to those who watch its hue, Of sickness, death and suffering too; Though who, just viewing aught so fair, Could dream that death was there!"
